

Zita West Assisted Fertility - Fees from January 1st 2024

Please refer to separate brochure on Multi Cycle package options.

Consultation	
Initial treatment consultation	230
Your consultation will be booked for 90 minutes and your consultant will review your medical history and the results of your fertility investigations. At the end of the consultation, they will recommend an individualised treatment plan or recommend additional tests. If you do need extra tests there will be additional cost and your consultant may not be able to provide a full treatment plan until the test results are known	
Pre-Consultation Cancellation Policy	
You may cancel your appointment any time before the 14 day cancellation period ends. Once we have provided the services you cannot change your mind, even if this is within 14 days of the date of confirmation of your appointment. If you cancel your appointment before the cancellation period ends, then we will refund any fees paid in full in relation to your consultation. If you cancel your appointment after the cancellation period ends, then we will still refund you in full provided you give us 48hrs notice prior to the date of your consultation. If you do not attend your appointment without giving notice of cancellation then we will not refund any fees paid in relation to your consultation. If you have completed pre-consultation tests, but choose not to attend your consultation, we will provide you with a copy of those test results and will refund any consultation fees in line with our cancellation policy, but you will not be eligible for a refund for cost of the test services provided. Further information is available on our website and in our terms and conditions which are provided at the time of booking	
Follow up Consultation	180
Recommended screening	
If you have had an AMH, TSH or vitamin D test or scan within the last six months or a diagnostic semen analysis test within the last year, you can share the results with the Zita West Clinic, and these tests won't usually need repeating	
If you are providing sperm for treatment	
<ul style="list-style-type: none"> Diagnostic Semen Analysis 	205
If you are providing eggs for treatment and/or having embryo transfer	
<ul style="list-style-type: none"> Detailed pre-treatment scan – including antral follicle count 	225
<ul style="list-style-type: none"> Anti-Mullerian Hormone level blood test 	140
<ul style="list-style-type: none"> Thyroid stimulating hormone blood test (recommended but optional) 	82
<ul style="list-style-type: none"> Vitamin D level blood test (Recommended but optional) 	78
<ul style="list-style-type: none"> Rubella (Recommended to ensure immunity; allow time for vaccination or consider the risks if non immune) 	53

Treatment costs

The tables below set out the likely typical cost of treatments provided by Zita West Clinic

Intrauterine insemination with partner or donated sperm:	
IUI treatment The cost covers nurse planning, sperm preparation; insemination and post-treatment review appointment. The cost of donor sperm is not included.	1,250
In cycle monitoring scans (cost per scan) You may need 1-3 scans	225
Pregnancy scan (cost per scan) We generally offer two pregnancy scans	220
Estimated drug costs in a medicated or stimulated cycle 50% of our patients pay less than £40 for their drugs in an IUI cycle For the remaining 50%, the typical cost of medication is £375, which includes rare situations where a patient requires medication costing up to £771. The type of cycle we recommend for you will depend on your medical history and the results of tests carried out as part of your pre-treatment planning.	
HFEA fee only applicable if using donated sperm	37.5

IVF	
IVF with fresh embryo transfer The cost covers nurse consultations, monitoring scans, sperm preparation, conscious sedation charges for egg collection, embryo creation, 2 counselling sessions, a nutrition & lifestyle assessment, fresh embryo transfer; pregnancy scan or post-treatment review appointment.	4,540
IVF with elective freeze of all embryos The cost covers nurse consultations, monitoring scans, sperm preparation, conscious sedation charges for egg collection, embryo creation, 2 counselling sessions, a nutrition & lifestyle assessment, post-treatment review appointment. The cost of frozen embryo transfer is not included. The cost of embryo freezing and on-going storage is not included and is payable to Care Fertility London – see costs below.	4,400
Monitoring blood tests Includes all in cycle blood tests	556
Extended culture/blastocyst transfer	655
Estimated drug costs Our medication is tailored to each patient based on their medical history and blood test results with costs typically between £1,500 and £3000. When treatment with a fresh embryo transfer leads to pregnancy, we prescribe additional medication. The typical additional cost of this luteal support medication is £190.	
HFEA fee	85
Intracytoplasmic sperm injection (ICSI) ICSI is required if the results of the diagnostic semen analysis or previous treatment history indicate it is needed	1,395

Shared Motherhood/Parenthood	
<p>Shared Motherhood/Parenthood</p> <p>The cost covers nurse consultations, monitoring scans for the partner providing eggs and the partner having embryo transfer; donor sperm preparation, conscious sedation charges for egg collection, embryo creation, 2 counselling sessions, a nutrition & lifestyle assessment, fresh embryo transfer; pregnancy scan or post-treatment review appointment.</p>	5,580
<p>Shared Motherhood/Parenthood - Elective Freeze All</p> <p>The treatment cost includes a consultation with a donation expert, implications counselling, specialist guidance on parenthood consent, nurse planning, and monitoring scans for the partner providing eggs; in-treatment blood tests, donor sperm preparation, egg collection with conscious sedation or local anaesthetic, embryo creation, culture and freezing of all embryos, one year's storage of embryos and counselling support. The cost of frozen embryo transfer is not included.</p>	4,700
<p>Infectious screening for the egg provider</p> <p>The law requires all clinics to perform infectious screening for the egg provider in a shared motherhood treatment. This screening is needed in every cycle of stimulation and this cost is for the minimum screening required by law. If you compare costs between clinics, we encourage you to factor this screening into your comparison.</p>	223
<p>Drugs costs</p> <p>Our medication is tailored to each patient based on their medical history and blood test results with costs typically between can range from £1,165 to £1,310.</p> <p>Patients having a transfer of embryos created using their partner's eggs are typically prescribed drugs costing between £280 and £545 to prepare their uterus for embryo transfer.</p> <p>When treatment results in pregnancy we prescribe additional medication. Our research has shown that 33% of patients do not absorb enough progesterone medication from pessaries and we prescribe injectable progesterone for luteal support. The additional cost of this medication is up to £750.</p>	
HFEA fee	85
<p>Intracytoplasmic sperm injection (ICSI)</p> <p>ICSI is required if the results of the diagnostic semen analysis or previous treatment history indicate it is needed</p>	1,395

Frozen Embryo Transfer	
<p>Frozen embryo transfer (FET)</p> <p>The cost includes nurse consultation, monitoring scans, in-treatment blood tests, embryo thawing, culture and transfer, pregnancy scan or post-treatment review appointment and counselling support.</p>	2,750
<p>Drug costs</p> <p>Patients having transferred frozen embryos are typically prescribed drugs costing between £280 and £545 to prepare their uterus for embryo transfer.</p> <p>When treatment results in pregnancy we prescribe additional medication. Our research has shown that 33% of patients do not absorb enough progesterone medication from pessaries and we prescribe injectable progesterone for luteal support. The additional cost of this medication is up to £750.</p>	
HFEA fee	85

IVF treatment with own frozen eggs	
<p>IVF using patient's own frozen eggs</p> <p>The cost includes nurse consultation, a nutrition & lifestyle assessment, monitoring scans, thawing of eggs, sperm preparation, insemination using ICSI, embryo culture, fresh embryo transfer, pregnancy scan or post-treatment review appointment and counselling support.</p>	4,920
Blastocyst culture and transfer	655
<p>Drug costs</p> <p>Patients having transfer of embryos created with their own frozen eggs are typically prescribed drugs costing between £280 and £545 to prepare their uterus for embryo transfer.</p> <p>When treatment results in pregnancy we prescribe additional medication. Our research has shown that 33% of patients do not absorb enough progesterone medication from pessaries and we prescribe injectable progesterone for luteal support. The additional cost of this medication is up to £750.</p>	
HFEA fee	85
<p>Intracytoplasmic sperm injection (ICSI)</p> <p>ICSI is required if the results of the diagnostic semen analysis or previous treatment history indicate it is needed</p>	1,395

IVF related supplementary procedures	
Although not required, we recommend that all patients having IVF consider including the following options in their treatment plan	

CAREmaps	995
This is the exclusive embryo selection algorithm used by our partner clinic Care Fertility London.	
Freezing of embryos remaining after fresh embryo transfer	525
We recommend that patients plan for the potential cost of freezing surplus embryos. Having frozen embryos allows further frozen embryo transfer treatment without repeating all medical interventions or incurring the costs of a complete treatment cycle. Freezing does not include the cost of storage which must be paid separately.	
Storage of frozen embryos (annual charge)	405
Storage of frozen embryos (when paid by monthly direct debit)	33.8

Mandatory Infectious screening	
UK law requires patients providing eggs for their own or sperm for their partner's treatment to be screened for HIV and hepatitis three months before their first treatment cycle and then once every two years. All UK clinics have to do this - please factor in the cost of these tests when comparing prices. If you are coming to Care for the first time and have the results of previous tests, you may not need to repeat these screening tests.	

Infectious screening for the sperm provider	201
Infectious screening for the egg provider and person having transfer (if different)	251
<ul style="list-style-type: none"> Standard infectious screening and chlamydia 	

Donor sperm	
Our partner clinic, Care Fertility London can supply donor sperm from their own bank or arrange transfer of donor sperm purchased independently to Care Fertility London for treatment. Fees are payable to Care Fertility London.	

Donor sperm	
Includes donor matching, reservation and transfer of donor sperm to Care Fertility London and donor sperm for one treatment cycle. This fee is payable to Care Fertility London	1,280
Import of donor sperm purchased from a partner sperm bank	
Includes one year's storage	645

Preimplantation Genetic Testing (PGT)	
PGT-A, M and SR can only be provided in an elective freeze all IVF treatment cycle. The cost of frozen embryo transfer is not included in costs. Genetic testing is carried out by our partner clinic, Care Fertility London. Fees for these services are payable to them.	

PGT-A (within a treatment cycle)	
This optional embryo selection treatment is recommended to patients where the eggs for treatment are provided by someone aged over 36 or to patients who have experienced recurrent miscarriage.	
PGT-A fee	
The fee includes treatment set up, biopsy set up and CAREmaps. Extended culture and ICSI (if required) are not included in the fee	1,360
PGT-A fee per embryo biopsied	355

PGT-A (testing of previously frozen embryos)	
Embryo thaw, biopsy, and refreeze	
fee includes embryo thaw, treatment set up, biopsy set up.	1,715
PGT-A fee per embryo biopsied	355

PGT-M screening for single gene mutations	
Insemination of eggs must be by ICSI for PGT-M: the cost of ICSI is not included.	
Single gene testing of up to 9 samples - initial cycle	7,100
Single gene testing of up to 9 samples - second and subsequent cycles	4,990
Two gene testing of up to 9 samples - initial cycle	9,285
Two gene testing of up to 9 samples - second and subsequent cycles	5,055
Single gene testing of up to 9 samples with HLA matching	9,280

PGT-SR screening for structural rearrangements of chromosomes	
Insemination of eggs must be by ICSI for PGT-M: the cost of ICSI is not included.	
PGT-SR testing of up to 8 samples – initial cycles	4,965
PGT-SR biopsy charge – second and subsequent cycles	780
PGT-SR additional sample charge (per sample tested above 8)	490

<p>Freezing and storage of eggs or sperm for fertility preservation</p> <p>All patients freezing eggs or sperm must have standard infectious screening tests unless they can provide the results of tests from three months before freezing. UK law requires infectious screening at the time of freezing if future surrogacy treatment is planned or likely – we can share these costs once future treatment plans are known</p>	
--	--

<p>Collection and freezing of eggs</p> <p>The cost covers nurse consultations, monitoring scans, monitoring blood tests during the cycle, sedation/anaesthetic charges for egg collection, freezing fee, VIOLET report and a free nutrition & lifestyle assessment.</p> <p>The costs of consultation, pre-treatment screening and storage and medication costs are not included.</p> <p>Our medication is tailored to each patient based on their medical history and blood test results with costs typically between £861 up to £1,693.</p>	4,920
<p>Sperm freeze per sample</p> <p>The cost includes consent planning, sperm freezing and counselling support. The cost of consultation, pre-treatment screening tests and ongoing storage are not included.</p>	125
<p>Storage of frozen sperm/eggs (annual charge)</p>	405
<p>Storage of frozen sperm/eggs (monthly direct debit)</p>	33.8

<p>Specialist and/or additional treatments and procedures</p> <p>Zita West patients may elect to use these treatments or we may recommend them to a small number of patients based on their individual medical history, previous fertility cycle outcome or pre-consultation screening tests. These procedures are payable to our partner clinic, Care Fertility London.</p>	
---	--

<p>Artificial oocyte activation (AOA)</p>	165
<p>Assisted hatching</p>	590
<p>EmbryoGlue</p>	360
<p>ZyMot sperm selection</p>	290
<p>Conscious sedation for embryo transfer</p> <p>The sedation cost at egg collection is included within the relevant treatment fee, a patient rarely requires sedation for the embryo transfer, and so this is not included in the treatment fee</p>	395
<p>Surgical sperm recovery</p> <p>The cost includes consent planning, sperm freezing, one year's storage, histology and review appointment as appropriate and counselling support. The cost of private consultation with a specialist urologist is excluded.</p>	3,020

Additional diagnostic tests, assessments and procedures

Patients may elect to use these treatments or we may recommend them to a small number of patients based on their individual medical history, previous fertility cycle outcome or pre-consultation screening tests. They can be added to treatment packages or provided to patients not in treatment.

Blood tests for the investigation of recurrent miscarriage and/or implantation failure	
Level 1 profile	
Includes the following blood tests: full blood count, blood glucose, LFT's, U&E's, thyroid function tests, thrombophilia screen (anticardiolipin antibodies (IgG and IgM), antithrombin 111, factor V Leiden, factor II prothrombin gene), PAIP polymorphism, activated protein C resistance, Protein C/Protein S, lupus anticoagulant, MTHFR, autoimmune antibodies (including anti-nuclear antibodies, thyroid peroxidase and anti-mitochondrial antibodies)	1,163
<ul style="list-style-type: none"> Level 2 profile 	
Includes natural killer cell (NK) assay and TH1:TH2 ratio	1,051
PAI-1 polymorphism individual test	239
NK Assay individual test	640
Follow up NK Assay individual test when repeating assay after treatment	518
T helper1 (Th1) and T helper 2 (Th2) cytokine ratio (individual test)	535
Counselling	
Two sessions of implication or Support counselling are included in the IVF package price and can be taken before, during or up to 3 months after your cycle.	150
Additional Support counselling (for longer-term support) – per 1 Hour session	
Additional Implication counselling (for egg or sperm donation or surrogacy)	110
ERA	1,475
EMMA	1,040
ALICE	635
EndomeTRIO (package price for ERA, EMMA, ALICE)	2,070
Endometrial scratch	365
Individual Hormone tests (eg Beta HCG, FSH, LH, oestradiol or progesterone)	58
Please note: TDL charges an additional fee of £15.00 to take a blood sample for testing	
Intralipid therapy (per infusion)	425
Ultrasound scans	225

Complementary Therapies

Acupuncture Initial Consultation – 1 hour	110
Acupuncture treatment – single session	70
Follow-up nutritional consultation – 30 minutes	70
Hypnotherapy and positive visualisation	160
Nutritional consultation – 1 hour	160
Nutritional couples' consultation - 90 minutes	230
One nutritional and lifestyle consultation for the couple is included in the IVF package, all additional consultations or email support is chargeable	

Transfer-in/out fees to or from our partner clinic, Care Fertility London	
--	--

Transfer-in fees	
Transfer-in of patient sperm/eggs/embryos from a Care clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	0
Transfer-in of patient sperm/eggs/embryos from a UK-based non-CARE clinic (provided treatment commences within one year of transfer)	0
Transfer-in of patient sperm/eggs/embryos from an overseas clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	288
Personal import of donor sperm for named patient (includes up to one year's storage free of charge) Patients are responsible for payment of fees charged by couriers for the movement of sperm	645

Transfer-out fees	
Transfer of sperm/eggs/embryos from one Care clinic to another Care clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	0
Transfer of sperm/eggs/embryos stored at Care to a UK-based non-Care clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	288
Transfer of sperm/eggs/embryos stored at Care to an overseas clinic Patients are responsible for payment of fees charged by couriers for the movement of sperm/eggs/embryos	1,080

Treatment Cancellation Fees	
------------------------------------	--

Occasionally treatment cycles are cancelled. The information below sets out the most common scenarios and the amount payable in each case:

Frozen embryo replacement, IUI	
Cancelled at the monitoring stage	625

IVF, Egg Freezing and Egg Safe	
Cancelled at the monitoring stage	980

If treatment is cancelled post-monitoring but before embryo replacement, then a refund will be paid to the patient as follows:

Failed egg recovery (plus HFEA fee refund)	485
Failed fertilisation/cleavage	380
Failed frozen embryo thaw (plus HFEA fee refund)	920

PGT-A	
The PGT-A fee is refundable in full if a failed egg recovery/fertilisation/cleavage occurs.	1,360
A partial refund is available if embryos are cultured, but none are biopsied.	365

Payment Options

Treatment fees are paid before the treatment starts. Bank transfer, debit and credit cards are accepted methods of payment. Our preferred method is by debit card.

In cases where your health insurance may fund consultations and investigations, you must pay the fees directly to CARE and then claim the cost back from your insurer. We are unable to negotiate claims directly with health insurers.

Zita West Clinic reserves the right to amend prices. If you have a consultation with Zita West Clinic and agree to a recommended course of treatment, we will provide you with a fully costed treatment plan and an invoice that sets out the cost of the medications we recommend. Once the treatment and medication invoices are paid, we will provide treatment for the agreed price, which will not change unless we give you six months' notice. If we implement price changes before you have paid your invoices for treatment then we will provide you with an updated costed treatment plan and invoices so that we can expressly agree the cost of treatment with you before you enter into a contract with Care by paying for your treatment and medication.

Effective from 7 November 2022.
